

FOLISEC HORTI

Leaf insects woody plants
Horticulture

Usage FOLISEC HORTI can be used in horticulture where a less vital soil, substrate and weak resistance of the plant and crop can cause abiotic stress. The product supports the natural regenerative capacity, is indirectly nourishing, nurturing and plant-strengthening in case of external influences, in the soil and at the roots.

Composition FOLISEC HORTI consists of a highly concentrated composition of specifically selected herbal concentrates based on water. The product is of natural and vegetable origin. The product is safe for humans, animals and the environment.

Operation FOLISEC HORTI is absorbed by soil, substrate and roots of the plant. Thanks to the available biostimulants and plant-strengthening components, plants and crops will indirectly develop increased resilience and vitality.

The product can be applied thru or LVM.

Application FOLISEC HORTI works best if used preventively. In some crops it may be necessary to add a wetting agent. It is recommended to first carry out a trial spray treatment.

To guarantee diversity through the season, 4 variants of FOLISEC HORTI are available. These are the variants A-B-C-D. It is advised to switch to different variants after some time. The different variants can be used alternately. The different versions are indicated on the label.

FOLISEC HORTI (L) dissolved in water can be applied thru spraying, fertigation or LVM. **The following dosages are guidelines. Always consult your crop advisor for a specific advice.**

Dosage guideline | Spray treatment

Surface m ²	Low dosage		High dosage	
	FOLISEC	Water	FOLISEC	Water
10.000	1 liter	50 liter	1 liter	30 liter

Dosage guideline | Fertigation

Surface m ²	Low dosage	High dosage
	FOLISEC	FOLISEC
10.000	10-20 liter	20-30 liter

Add the product to the C-container. If not possible, add to the B-container

Dosage guideline | LVM

Low dosage		High dosage	
FOLISEC	Water	FOLISEC	Water
1 liter	2 liter	1 liter	1 liter

Fill tank with indicated concentration
