

# HERFOSEC HORTI

Leaf insects Horticulture

- Usage** HERFOSEC HORTI can be used in horticulture where a less vital soil, substrate and weak resistance of the plant and crop can cause abiotic stress. The product supports the natural regenerative capacity, is indirectly nourishing, nurturing and plant-strengthening in case of external influences, in the soil and at the roots.
- Composition** HERFOSEC HORTI consists of a highly concentrated composition of specifically selected herbal concentrates based on water. The product is of natural and vegetable origin. The product is safe for humans, animals and the environment.
- Operation** HERFOSEC HORTI is absorbed by soil, substrate and roots of the plant. Thanks to the available biostimulants and plant-strengthening components, plants and crops will indirectly develop increased resilience and vitality.
- The product can be applied thru LVM.
- Application** HERFOSEC HORTI works best if used preventively. In some crops it may be necessary to add a wetting agent. It is recommended to first carry out a trial spray treatment.
- To guarantee diversity through the season, 4 variants of HERFOSEC HORTI are available. These are the variants A-B-C-D. It is advised to switch to different variants after some time. The different variants can be used alternately. The different versions are indicated on the label.
