

Natural smell extracts from plants

- Usage** Scent has an important role in nature. Plants produce scent to lure or repel insects. Some birds use this trick by weaving certain herbs in their nests. DELUMBRI uses this natural principal of repellence by smell. DELUMBRI can be used in public gardens, agriculture and horticulture.
- Composition** DELUMBRI is a water based, highly concentrated composition made of specific selected herbal concentrates. DELUMBRI is a natural product from vegetable origin. The product is safe for human, animal and environment. Available in liquid form and granular form.
- Operation** DELUMBRI supports the natural regenerative capacity and has a nurturing, nourishing and enhancing effect on the plants.
- Application** DELUMBRI works best if applied preventively. For more information ask your crop advisor.

Application and dosage (liquid form)

DELUMBRI (L) dissolved in water can be poured, sprinkled, sprayed or injected. Spray with a coarse nozzle to allow the product to reach the soil.

Application and dosage (grain form)

DELUMBRI (G) can be applied wide-spreaded in existing situations. For optimum operation humid condition are required.

Acreage		Low dosage		High dosage		Surface in M ²		Low dosage	High dosage
M ²	DELUMBRI	Water (litre)	DELUMBRI	Water (litre)					
1.000	1 litre	50-100	2 litre	50-100	500		10 kg		20 kg
5.000	5 litre	250-500	10 litre	250-500	5.000		100 kg		200 kg
10.000	10 litre	500-1.000	20 litre	500-1.000	10.000		200 kg		400 kg
