

# STIMUTER HORTI

Root stimulation Horticulture

**Usage** STIMUTER HORTI can be used to increase the resistance and vitality of all plants in the horticulture. The product supports the natural regenerative capacity and has a nurturing, nourishing and enhancing effect on the plants of which the soil and roots are affected by external causes.

**Composition** STIMUTER HORTI is a water-based, highly concentrated composition made of specific herbal concentrates. STIMUTER is a natural product of vegetable origin. The product is non-toxic, non-persistent and does not leave residues in the environment. Available in liquid form and micro granular form.

**Operation** STIMUTER HORTI supports the natural regenerative capacity of the soil, substrate and plants. The product has a nurturing, nourishing and enhancing effect on the plants. STIMUTER HORTI is absorbed by the soil, substrate and the plants. Its root-stimulating and plant enhancing ingredients will allow the plants to develop an increased resistance and vitality.

**Application** STIMUTER HORTI works best if used preventively. In some crops it may be necessary to add a wetting agent. It is recommended to first carry out a trial treatment.

Add the liquid product to the C-container. If not possible, add to the B-container. The granular and micro granular products can be strewn and/or mixed through the soil during sowing or planting. Always consult your crop advisor for a specific advice.

STIMUTER HORTI dissolved in water can be applied thru fertigation or pouring onto the plants. STIMUTER HORTI micro granular can be mixed in the potting soil during potting. **The following dosages are guidelines. Always consult your crop advisor for a specific advice.**

**Dosage guideline | Fertigation**

Surface	Low dosage	High dosage
m <sup>2</sup>	STIMUTER	STIMUTER
10.000	10-20 liter	20-30 liter

**Dosage guideline | Watering cuttings**

STIMUTER	Water
1 liter	50 liter

**Dosage guideline | Micro granular potting**

STIMUTER Micro granular	Substrate
5 kg	1.000 liter
